NQ SH  **LVING**
& STORAGE

NQ SHELVING & STORAGE

NQ Shelving & Storage is an independently owned business servicing the local warehousing and commercial office needs of customers in Townsville, Cairns and the greater North Queensland region.

We have all your pallet racking and shelving requirements covered. With over 40 years experience, you'll get the best advice on quality storage solutions from our team of knowledgeable staff who are happy to answer your questions in our well-stocked showroom, or chat over the phone or via email.

We also offer a consultancy service, provide design expertise and are qualified to conduct rack inspections. Whether it's for the warehouse, workshop or office, all NQ Shelving & Storage products are built to the highest quality standards. Our range of racking is made from high-grade steel, and our range of commercial products such as Compactus®, lockers and filing cabinets are cleverly designed and built to last.

No matter how big or small your needs, trust NQ Shelving & Storage to deliver the kind of smarter thinking that puts your business ahead.

INDUSTRIAL STORAGE

INDUSTRIAL STORAGE

PALLET RACKING

You have a lot relying on your pallet racking system. A pallet rack has to carry the heavy load of handling supplies, inventory and essentially deliver easy access and total storage solutions.

Selective Racking

Dexion Speedlock P90 Selective Pallet Racking is cost effective, high capacity storage.

Selective racking allows you to take advantage of cost effective, high capacity storage that enables easy access to products. It's ideal for businesses managing complex orders and mixed SKUs. Simple to install, selective racking is easily adjustable and customisable to your business needs. Serviced by conventional forklift trucks.

It is the most common type of pallet racking and allows access to every single pallet within the pallet racking structure at any time. It is considered as the lowest cost pallet racking solution type.

Specifications

Bay Height

From 900mm to 11400mm

Bay Width

From 1350mm to 5000mm

Bay Depth

From 600mm to 1500mm

Standard Beam Sizes

Box Beam Series: 90mm x 40mm, 100mm x 40mm, 105mm x 50mm, 140mm x 50mm

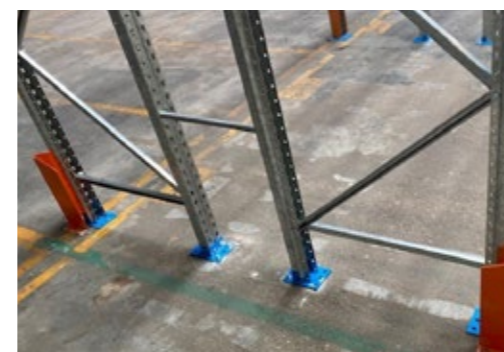

RHS Series: 100mm x 50mm, 150mm x 50mm

Standard Upright Sizes

90mm Series, 100mm Series & 120mm series

Standard Upright Finishes

- Dexion Orange or Hot Dip galvanised (Beams)
- Pre-Galvanised
- Custom Colour available

Speedlock Shelving

The ultimate in heavy-duty shelving.

Made from the same beams and uprights we use in pallet racking, Speedlock is the ultimate in economical, heavy-duty shelving.

The wide selection of beam sections and lengths means it can suit almost any space, while the bolted construction ensures it's fully adjustable and can be fitted with timber or mesh shelves.

Specifications

Shelving Bay Height

900, 1800, 2400, 3000mm

Shelving Bay Width

1350, 2600, 2750, 3850mm

Shelving Bay Depth

600, 750, 840, 900, 1000, 1050, 1200, 1300, 1350, 1500mm

Shelving Options

Particle Board, Mesh or Melamine
"Structural Ply" Particleboard (Townsville Only)

Double Deep Racking

Dexion Speedlock P90 Double Deep Pallet Racking is practical for high-volume single SKUs required for rapid despatch.

Store up to four pallets deep for swift dispatch of large, single-SKU orders. The double entry aisle offers easy access through dual pantograph or sliding fork attachments. Ideal for businesses with a minimal range of products who deliver in high volumes.

Specifications

Rail Length

2450mm

Bay Width

2600mm & 2750mm

Rail Options

Standard & Heavy Duty

Pallet Stop

Standard: Optional Bolted
Heavy Duty: Welded

Narrow Aisle Racking

Dexion Speedlock P90 Narrow Aisle Pallet Racking optimises your floor area and roof height.

Optimise your floor area and roof height, while retaining direct access to every pallet resulting in greater storage density. Special forklifts are required and operating cabins may be elevating or static.

Specifications

Immediate Accessibility	100%
Handling Equipment	Specialised Forklift
Average Locations Used	95%
Stock Rotation	Good
% of Floor Space Covered by Storage	46%

Push Back Racking

Dexion Push Back Racking is a high density system which allows direct access to large batches of goods with the same SKUs. Each level allows storage depth of two to six pallets.

The gravity-fed operation ensures the pick-face is constantly filled, arranged on a First In, Last Out basis (FILO). Push-back is ideal for storing medium-turnover products, with two or more pallets per SKU.

How it works:

Pallets are loaded on top of a sliding cart and pushed deeper into the rack when the next pallet is loaded. Up to 6 pallets can be stored per channel. At each level, pallets are placed on a set of trolleys that are pushed along rails. During unloading, the front pallet is removed by the fork truck and as it is taken away, the next pallet rolls forward along a set of rails.

Specifications

Pallet Size	1165mm x 1165mm (Timber Pallet)
Pallet Capacity	1200kg
Pallet Weight Range	500kg to 1200kg
System Depths	2 Pallets Deep 3 Pallets Deep 4 Pallets Deep 5 Pallets Deep 6 Pallets Deep
Operating Temperature	%46
Safety Features	- Lift out protection - Linked carts - Pallet stop
Accessories	Pallet Guide

CANTILEVER RACKING

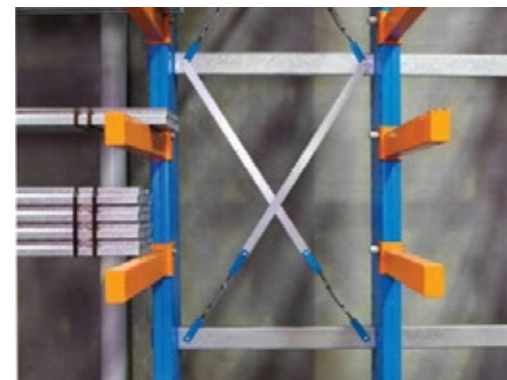

Cantilever Racking is designed to store long, awkward, or bulky materials of virtually any length. Unlike pallet rack system, cantilever racks offer no vertical obstructions in the storage area.

Heavy Duty Cantilever Racking

Used in a wide range of industries, including steel and timber, plumbing and hardware.

The Clearspan Heavy Duty Cantilever allows you to house a range of extra heavy or extra-long items with ease. There are no front uprights to impede access. The galvanised option is suited to outdoor storage requirements. This solution is used in a wide range of industries, including steel and timber, plumbing and hardware, furniture wholesalers and garden supplies.

Specifications

Column Height - Depth 300mm

3300, 4200, 4800, 6000mm

Column Height - Depth 305mm

Arm Length

600, 900, 1200mm

Standard Colours

Red (Arms), Blue (Columns)

Finish

Powder coated, Galvanised

Note

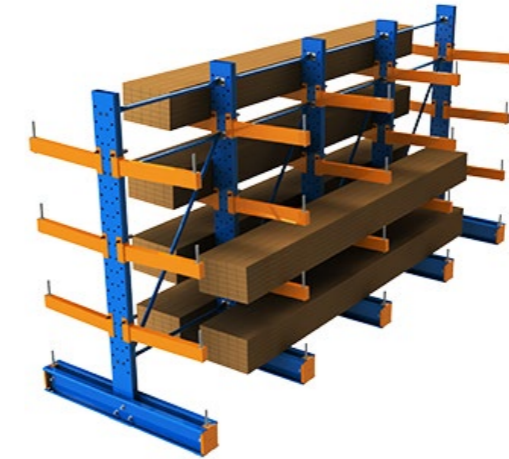

Components also available in hot dip galvanised for outdoor use. Wind Load Calculations need to be considered in the design of this product for all outdoor applications. Single sided and double sided configurations available.

Light Duty Cantilever Racking

Dexion Clearspan Light Duty Cantilever is ideal for storage of long, awkward-shaped or oversized products. This rack is designed to carry lighter loads of up to 1,000kg.

A cost-effective solution where products are loaded from the front of the system without any interference from uprights or beams.

Developed to store lengthy goods such as timber, pipe and long bulky items that cannot be palletised and stored in conventional pallet racking systems.

Specifications

Column Lengths

2000, 2400, 3600mm

SHUTTLE RACKING

Maximise your warehouse management with high density semi-automated shuttle systems.

Dexion HDS Shuttle

The Dexion High Density Storage (HDS) Shuttle offers high density pallet storage without the use of forklifts.

The shuttle unit travels on support rails, transporting pallets within the system by retrieving and depositing pallets, controlled by the user via remote control. The HDS Shuttle incorporates various features to ensure safe handling, high reliability and low energy consumption.

This solution makes the most use of limited space and provides high density storage for both highly active or static stocks with low SKUs. The system is scalable according to the warehouse operations, throughput and goods volume.

Specifications

Number of wheels	4 or 8	Safety Features	- Ground stops - Back stops - Emergency button
Unload Time	4 sec	Add-ons	- Collision sensors - Tyne pockets - Safety carriage - Electromagnetic locking system - Anti-tilting alarm - Drop alarm

ACCESORIES

Let us help you find the pallet racking extras your business needs with our comprehensive range of high quality accessories.

Cable Drum Storage

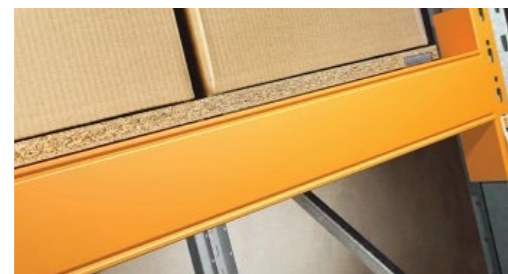

Designed for ease of access to bulky items such as rolls of cable, chain or rope. Integrated into your existing pallet racking our Cable Drum Storage is versatile and a cost effective system that maximizes your storage space.

Chipboard Retainer

Secure particleboard to beam levels.

Secures particleboard to beam levels easily without any permanent fixing. You'll need four retainers for each particleboard sheet.

Coil Support Bars

Designed to aid in the storage of large cylindrical objects such as coils or 44 gallon drums on pallet racking in a flat horizontal position.

Fork Entry Bar

Used for unsuitable pallets or un-palletised loads.

When unsuitable pallets or un-palletised loads need to be stored on beams and handled by forklifts, Fork Entry Bars are deployed. The bars allow a gap for forks of approximately 75mm above the beam. They're not suitable for step or open beams. Available in 840mm and 1219mm.

Mesh Deck

Light, medium and heavy duty decks available.

With uniquely profiled supports, it offers super support for light, medium and heavy-duty applications to suit all rack sizes. A mesh deck can reduce your pallet hire cost and eliminate double handling.

Pallet Support Bar

Support extra-heavy loads or non-standard sized pallets.

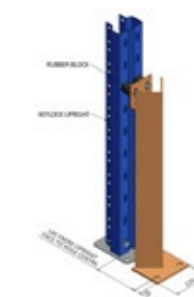

Support extra-heavy loads or non-standard sized pallets. The bars span across the frames and are supported at each end by the beams. Often used as a secondary support for pallets or shelving, but not suitable for step or open beams.

Rack Protection Options

Column Guard

The guard stands immediately in front of a 90 or 100mm upright, and its function is to provide a degree of resistance to the bottom 400mm of upright from front impact damage by fork lift trucks. When used, the bottom of the lowest beam must clear the height of the guard.

Upright Protector

The Keylock/Speedlock Mk8 Upright Protector stands immediately in front of the upright, providing a level of protection up to 600mm, against impact by forklift trucks or other lifting equipment.

It is connected to the upright by:
2 x Upright Protector rubber blocks
2 x M10 x 50 Hex head set screw ZP Grade 5.8

Smart Guard

Clip-on, wrap-around SmartGuard upright protectors is an energy absorbing rack protector, tested to FEM 10.2.02, providing resistance to impact by forklift trucks or other lifting equipment up to a height of 800mm. The patented design fits all grades of 90mm upright and fits over the Dexion standard and welded baseplate range. The protector is positively anchored by means of two tongues, which fit into the SmartGuard clips to lock the assembly to the upright.

Protect It's

The Protect-it range of products are designed and manufactured in Australia to exceed both Front and Side impact resistance in Australian Standard AS4084-2012, EN standards and FEM Standards.

Rack End Protector

Rack End Protectors guard against damage from fork lifts and other vehicular traffic within a warehouse. Installed at the end of racking rows, either single or double entry, and in fork lift drive through bays.

INDUSTRIAL STORAGE

Pallet Drawers

The Dexion Pallet Drawers provide an ergonomic and safe way to hand pick various storage items within the pallet racking structure.

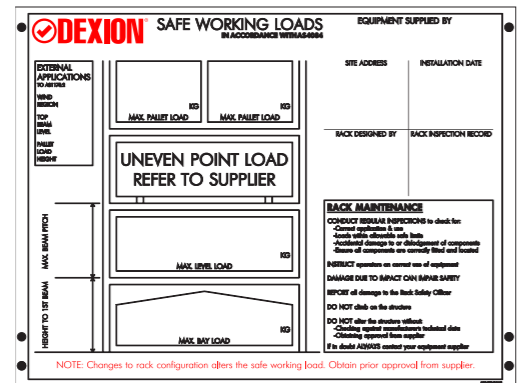

Rollers allow the drawer to be easily opened or closed, giving the pickers free access to the pallet from three sides. The Pallet Draw is self-latching on return preventing accidental release into the aisle.

Safe Working Load Sign

Ensure safety in the workplace.

Ensure safety in the workplace with a safe working load that informs of allowable safe limits for loads.

Upright Cap

Suits 90R, 90M, and 90H grade uprights.

Cover sharp edges with this moulded upright cap to fit over the top. Suits 90R, 90M, and 90H grade uprights.

SHELVING

SHELVING

Shelving is the basic building block of any storage solution, whether for a warehouse or office. Our options focus on providing the maximum possibilities, without sacrificing quality and durability, so they can grow and adapt as your organisational needs change.

Longspan Shelving

Dexion Ultima Longspan is a strong and durable shelving system that is smart and clean in appearance, fast and easy to assemble and reconfigure.

These features make it the ideal shelving solution for a wide variety of applications.

Specifications

Shelving Bay Height
900, 1200, 1500, 1800, 2000, 2200, 2500, 3000mm

Shelving Bay Width
900, 1200, 1500, 1800, 2100, 2400mm

Shelving Bay Depth
400, 450, 500, 600, 760, 900, 1200mm

EasyFit Wire Shelving

Improve storage capacity in hard-to-use areas combined with easy assembly.

Maximise your floorspace with this versatile, durable shelving solution. EasyFit® Wire Shelving is designed to suit storage of any kind, including medical equipment.

It comes in two long-lasting and functional finishes – chrome for dry environments and stainless steel 304 for harsh or wet environments.

Specifications

Shelving Bay Height
1000, 1200, 1500, 1800, 1900, 2000, 2100, 2200mm

Ultima CI-80 Accessories

Pull Out Reference Table

Optimise your office space with this smart, stable, pull-out shelf designed to use as a workstation.

Bin Fronts

Prevent small items falling from the shelf. Fitting the bin front to either the front or the back of a shelf ensures small items cannot fall out.

Adjustable Shelf Dividers

Subdivide your shelves easily with these handy dividers. Each divider is secured by four pins that fit into the oval holes on the top and bottom of the shelf. The shorter pins are for the top, slotting into the shelf above.

COMPACTUS

COMPACTUS

COMPACTUS

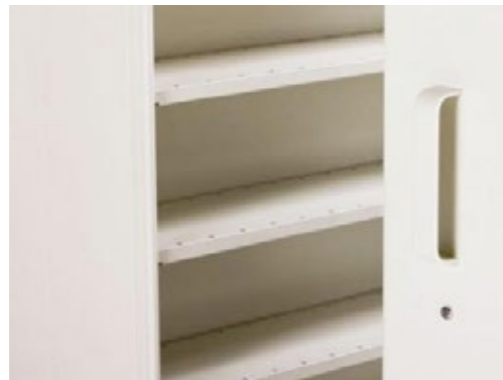

Static shelving mounted on mobile bases and runners. Optimise your floorspace with Compactus®, exclusive to Dexion. Mounted on mobile bases and runners, Compactus® is available in three configurations – manual, mechanically assisted and motorised.

Freetrack 2 Compactus®

Lightweight solution for almost anything you need to file.

Freetrack 2 Compactus® is an ideal lightweight system for just about any storage and filing application. With no floor-fixing required, the Freetrack 2 Compactus reduces the danger of operator strain, while allowing block loads of up to 1,000kg effortlessly.

Mekdrive 3 Compactus®

An ultralight cost-efficient mechanical filing and storage system.

Dexion's Mekdrive 3 Compactus revolutionises filing and storage systems with advanced technology and design. The Mekdrive 3 Compactus® now has up to 78% more storage capacity with increased width from 2700mm to 4800mm. Enhancements include a modern and unique stylised hand-wheel, providing safer and easier operation.

The Mekdrive 3 Compactus® is the lightest mechanically assisted mobile storage system available. It has been designed to keep floor loads to a minimum, a major consideration in commercial office buildings. The Mekdrive 3 Compactus® has an increased system width of four shelving bays, which could previously only be achieved with fixed-track systems.

Additional	GECA Level B Certification

SMALL PARTS STORAGE

SMALL PARTS STORAGE

SMALL PARTS STORAGE

NQ Shelving & Storage offers a wide range of quality small parts storage options. Small storage containers are excellent for a broad range of uses and professional applications including first aid kits, tool storage, and storage for schools. We offer a range of high-quality small storage boxes and small storage cabinets that fit in a variety of spaces.

Maxi Bins

A range of strong, stack-able, open-front storage containers.

Take advantage of the robust and versatile range of market leading maxi-bins. Made from polypropylene, maxi bins are commonly hung on louvre panels. Their unique interlocking design lets you stack them securely without the bin splaying under a heavy load, so you can use them in a shelving system or on a benchtop. Maxi bins come in seven sizes and five colours, which allow for colour-coded organising systems.

Specifications

- P5 Maxi Bin**
Dimensions: 100mm W x 120mm D x 60mm H
Max load: 2kg

Dividers

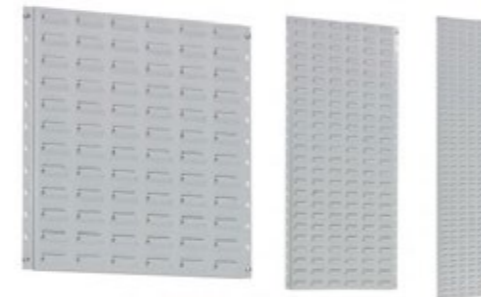

Plastic dividers for the Maxi and Shelf Bin ranges.

Maxi Louvred Panel – Wall Mounted

Turn any flat surface into practical storage space.

Turn any flat surface into small parts storage with the Maxi Bin wall mounted panel. The panel is attached securely to your wall to allow for all sizes of Maxi Bin to hang. You can also hang it to racks or shelf units, the end of a bench or a desk and even the back of a door. When you need to re-arrange your space, it's easily removable for use elsewhere.

RAISED STORAGE AREAS

RAISED STORAGE AREAS

RAISED STORAGE AREAS

Raised storage platforms provide additional storage areas in the workplace. Warehouse-raised storage areas are heavy-duty freestanding units that use uprights and platforms for support. The structural raised storage areas stack and store more product while simultaneously freeing up floor space.

Mezzanine Floor over Longspan Shelving

Longspan two-tier is flexible and robust with a wide variety of applications, such as archives, factories and retail outlets. It's readily customised to specific requirements; bay lengths can be mixed and matched, staircases added, along with pallet gates, bridges and anything else your space needs. Suitable for heavier, bulkier items.

Mezzanine Floor over Pallet Racking with Swing Over Pallet Gate

A raised platform made from structural steel is so strong you only need a limited number of pillars. This enables you to achieve uninterrupted space above and below which offers unlimited flexibility for utilisation of space. For example, you may want to utilise the ground floor as a workshop, for storage or manufacturing or packing area.

Tiered Platforms for Multi-Level Picking Access

Utilising your existing racking support structure, create tiered platforms to facilitate picking access at multiple levels. The platforms are constructed from either mesh grated steel or ply flooring. You can also incorporate conveyors for efficient material flow. Ideal for businesses that need a cost effective way of creating a raised storage area for hand-loaded goods that are not heavy in nature. Slow moving stock can be stored on upper levels leaving the ground floor for fast moving stock items. Also, it suits growing businesses that may need to dismantle and relocate the storage area in the future.

STEEL STORAGE

STEEL STORAGE

STEEL STORAGE

Made of durable steel construction, these metal storage lockers are great for workplace staffrooms, sports clubs and offices.

Lockers

A secure & well ventilated design, these units are a heavy duty construction with custom locking.

FirstLine Caddy

This mobile unit is suitable for filing and storing your documents, stationery and personal items. Combines the benefit of both a Pedestal and a Tambour in one unit.

Specifications

Width	1050mm
Height	640mm
Depth	460mm

FirstLine Lateral Filing Cabinet

When storing high volumes of suspension filing, you need cabinets that are built tough – but are designed to reduce workplace risk.

The FirstLine Lateral Filing Cabinet has a refined look, contemporary handle design and sturdy construction to store a high volume of documents.

Specifications

Width	910mm
Height	710mm (2 Drawer) 1010mm (3 Drawer) 1320mm (4 Drawer)
Depth	460mm

FirstLine Mobile Pedestal

This Mobile Pedestal has the popular ‘flush front’ design - with the side pull, doing away with the need to have more traditional, protruding handles.

The full extension runners on the unit’s drawers allow you to access all of the usable filing space with ease.

Specifications

Width	460mm 310mm (3 Drawer Slim)
Height	505mm (2 Drawer) 610mm (3 Drawer)
Depth	472mm

Strata 2 Bookcase

Smart, stylish and GECA-certified.

Smart and stylish, the GECA-certified Strata 2 Bookcase. Cabinet is ideal for showcasing its contents. It can be effortlessly converted into a Tambour Door or Swing Door Cabinet when your office needs change.

Specifications

Width	900mm
Height	1000, 1200, 1650mm
Depth	460mm

Strata 2 Planters

Improve your workspace look and feel with modular planters.

Planters are a premium range of cabinet planter boxes designed to be used on top of Strata 2 Tambour Door, Swing Door, Sliding Door, Lateral Drawer and Bookcase cabinets. The planters consist of three nested components: a powder-coated steel tray with adjustable pot openings, waterproof ABS liner (optional) for support and moisture protection and a powder-coated steel carcass. They can accept 200mm (8") pots as standard, with a maximum aperture of 230mm (9").
