

Coldroom Shelving

A single tier all purpose shelving system for a corrosive environment, such as a cool room, freezer or Laundry. Perfect for storage of items that benefit from the extra airflow offered by the mesh shelves, such as meats, dairy, vegetables or linen.

Assembly is quick and simple, no tools required. Beams clip easily into the pre punched welded frames while wire shelves drop effortlessly into position. Level the unit by the adjustable foot bolt.

ABS Black plastic shelves

NTH QUEENSLAND

Your Storage Solution Specialist

Coldroom Shelving

The use of centre “T” frames allows for the flexibility of add on bays as required, resulting in a more economical solution.

Utilizing corner frames allows for the most effective use of space by allowing the shelving unit to be positioned tight in the corner of a room while still allowing full access to the shelf pick face.

Join Two parallel bays together to provide additional storage shelves through the use of Bridging bays. These simply hook over the existing beams.
