

## Rack Inspections

With tougher safety standards and ever increasing work health and safety demands, being a warehouse manager has never been tougher. You have a duty of care to comply with legislation to ensure staff safety.

Why risk large WH&S fines, or even worse if an accident were to occur. Let us help you to provide a safe workplace by assessing your current racking against the Standard and providing a written report identifying and highlighting any compliance issues utilizing our cloud based racking inspection management system.

Our Rack Inspectors are fully qualified and trained to the highest industry level, ensuring the Racking user receives the most up to date and accurate information available.

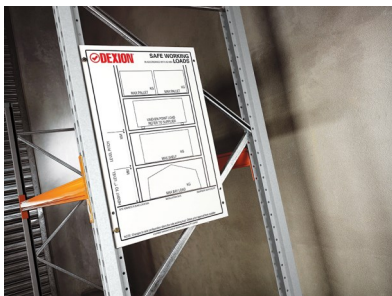

### Annual Inspections.

Inspection of racking structures to be carried out on a regular basis, at least once every 12 months. This is a requirement of AS4084-2012.

### Upright Protection.

Upright protection is required to protect the rack structure from impact damage.

### SWL Signs.

Racking installations shall have one or more Safe Work Load signs in conspicuous locations.

### Rack Maintenance.

Alterations to racking configurations are prohibited without the consent of the racking supplier.

## Racking Inspections

Get Dexion North Queensland to organize your next 12 monthly racking inspection and you will have access to unmatched support and service on your pallet racking through our new Cloud based management system.
